Scheme specific Risk Factors

- I. **Price-Risk or Interest-Rate Risk:** Fixed income securities such as bonds, debentures and money market instruments and derivatives run price-risk or interest-rate risk. Generally, when interest rate rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.
- II. **Credit Risk:** In simple terms this risk means that the issuer of a debenture/bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of the security may go down because the credit rating of an issuer goes down. It must, however, be noted that where the Scheme/s has invested in Government securities, there is no credit risk to that extent.
- III. **Reinvestment Risk:** Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- IV. **Liquidity Risk:** This refers to the ease with which a security can be sold at or near to its valuation or yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer.
- V. **Basis Risk:** The underlying benchmark of a floating rate security or a swap might become less active or may cease to exist and thus may not be able to capture the exact interest rate movements, leading to loss of value of the portfolio.
- VI. **Spread Risk:** In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.
- VII. **Liquidity Risk on account of unlisted securities:** The liquidity and valuation of the Scheme investments due to their holdings of unlisted securities may be affected if they have to be sold prior to their target date of divestment. The unlisted security can go down in value before the divestment date and selling of these securities before the divestment date can lead to losses in the portfolio.
- VIII. **Settlement Risk:** Fixed income securities run the risk of settlement which can adversely affect the ability of the fund house to swiftly execute trading strategies which can lead to adverse movements in NAV.

Different types of securities in which the Scheme/s would invest as given in the offer document carry different levels and types of risk. Accordingly the Scheme's risk may increase or decrease depending upon its investment pattern.

e.g. corporate bonds carry a higher amount of risk than Government securities. Further, even among corporate bonds, bonds which are AA rated are comparatively more risky than bonds which are AAA rated.

- IX. **Securitized Debt:** The Scheme in accordance with the asset allocation may invest in domestic securitized debt such as asset backed securities (ABS) or mortgage backed securities (MBS). ABS means securitized debts wherein the underlying assets are receivables arising from personal loans, automobile loans, etc. MBS means securitized debts wherein the underlying assets are receivables arising from loans backed by mortgage of properties which can be residential or commercial in nature. ABS / MBS instruments reflect the undivided interest in the underlying of assets and do not represent the obligation of the issuer of ABS / MBS or the originator of the underlying receivables. The ABS / MBS holders have a limited recourse to the extent of credit enhancement provided. ABS / MBS holders will suffer credit losses in the event of the delinquencies and credit losses in the underlying pool exceed the credit enhancement provided. As compared to the normal corporate or sovereign debt, ABS / MBS are normally exposed to a higher level of reinvestment risk. The fund intends to invest only in securitized instruments rated at least AA (SO) or its equivalent by a recognized credit rating agency. The securitized debt assets and the underlying asset classes like Housing Loans, Auto Loans and Corporate loans have the following risk factors:

A. Risk associated with Mortgage Backed Securities (MBS) - Housing Loans

Prepayment Risk: The Fund may receive payment of monthly payouts earlier than scheduled. Prepayments shorten the life of the instrument to an extent that cannot be fully predicted. The rate of prepayments may be influenced by a variety of economic, social and other factors.

Credit Risk: Delinquencies may happen which would reduce the principal amount. Typically MBS structures come with credit enhancement in variety of forms. If delinquencies are higher than the amount available in the credit enhancement facility, then the monthly payouts to the Fund would reduce.

Historically, it has been observed that housing loans have lower default rates as compared to other forms of credit.

Liquidity Risk: Historically the secondary market volume for securitised papers has been limited. This could limit the ability of the Fund to resell them. Secondary market trades could be at a discount or premium depending upon the prevailing interest rates.

Conversion Risk: Conversion of loans from fixed rates to floating rate loans and vice versa could lead to a change in the expected cash flows from the loans.

B. Risk associated with Asset Backed Securities (ABS)-Auto loans

Prepayment Risk: The Fund may receive payment of monthly payouts earlier than scheduled. Prepayments shorten the life of the instrument to an extent that cannot be fully predicted. The rate of prepayments may be influenced by a variety of economic, social and other factors. Prepayment in auto loans is lower than housing loans as the shorter tenor of auto loans makes it economically unattractive to prepay after considering the prepayment charges.

Credit Risk: Delinquencies may happen which would reduce the principal amount. Typically ABS structures come with credit enhancement in variety of forms. If delinquencies are higher than the amount available in the credit enhancement facility, then the monthly payouts to the Fund would reduce. Typically auto loans carry higher risk than MBS as the value retention of the underlying asset is higher in MBS as compared to the underlying asset of ABS.

Liquidity Risk: Historically the secondary market volume of securitised papers has been limited. This could limit the ability of the Fund to resell them. Secondary market trades could be at a discount or premium depending upon the prevailing interest rates.

C. Risk associated with Asset Backed Securities (ABS) - Corporate loans

Credit Risk: The Fund has an exposure to the Borrower/Borrowers and servicing of the instrument depends on the credit risk of the borrower. The value of the instrument would fluctuate depending upon the changes in the perceived level of credit risk as well as any actual default.

Prepayment Risk: The Borrower may prepay the receivables prior to their respective due dates. This may result in a change in the yield and tenor for the Fund.

Limited Liquidity and Price Risk: Historically the secondary market volume of securitised papers has been limited. This could limit the ability of the Fund to resell them. Secondary market trades could be at a discount or premium depending upon the prevailing interest rates.

X. Risk associated with investing in Derivatives:

As and when the Scheme trades in the derivatives market, there are risk factors and issues concerning the use of derivatives that investors should understand. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but also of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is a possibility that loss may be sustained by the portfolio as a result of the failure of another party (usually referred as the "counter party") to comply with the terms of the derivatives contract. Other risk in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

Thus, derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have a large impact on their value. Derivatives can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the Fund Manager to identify such opportunities. Identification and execution of the strategies to be pursued by the Fund Manager involve uncertainty and decision of Fund Manager may not always be profitable. No assurance can be given that the Fund Manager will be able to identify or execute such strategies. The risk associated with the use of derivatives is different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments. Derivatives may be riskier than other types of investments because they may be more sensitive to changes in economic or market conditions than other types of investments and could result in the losses that significantly exceed the Scheme's original investment. Certain derivatives may give rise to a form of leverage. Due to the low margin deposits normally required in trading financial derivative instruments, an extremely high degree of leverage is typical for trading in financial derivative instruments. As a result, the Scheme may be more volatile than if the Scheme had not been leveraged because the leverage tends to exaggerate the effect of any increase or decrease in the value of the Scheme's portfolio. A relatively small price movement in a derivative contract may result in

substantial losses to the investor.

Derivatives are also subject to the risk that changes in the value of a derivative may not correlate perfectly with the underlying asset, rate or index. The use of derivatives for hedging or risk management purposes or to increase income or gain may not be successful; resulting in losses to the Scheme and the cost of such strategies may reduce the Scheme's returns and increase the Scheme's potential for loss.

The Scheme may use derivatives to hedge market and currency risk, and for the purposes of efficient portfolio management. The use of derivatives may expose the Scheme to a higher degree of risk. In particular, derivative contracts can be highly volatile, and the amount of initial margin is generally small relative to the size of the contract so that transactions are geared.

The price at which credit default swaps trades may differ from the price of the credit default swaps' referenced security. In adverse market conditions, the basis (difference between the spread bonds and the spread of credit default swaps) can be significantly more volatile than the credit default swaps' referenced securities.

The risk associated with the use of derivatives is different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

Trading in derivatives has the following risks:

- a) to derivatives in excess of the hedging requirements can lead to losses.
- b) An exposure to derivatives can also limit the profits from a genuine investment transaction.
- c) Efficiency of a derivative market depends on the development of a liquid and efficient market for underlying securities.

d) Particular Risks of Exchange Traded Derivative Transactions

The securities exchange on which the shares of the Scheme may be listed may have the right to suspend or limit trading in all securities which it lists. Such a suspension would expose the Scheme to losses and delays in its ability to redeem shares of the Scheme.

e) Stock Market Fluctuations

Investors may note that the value of their investment may fall as well as rise and they may get back less than they originally invested. The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions.

f) Dividends

The Scheme may distribute not only investment income, but also realised capital gains or capital. Where capital is distributed, this will result in a corresponding reduction in the value of shares of the Scheme, and a reduction in the potential for long-term capital growth.

g) Warrants

The Scheme may invest in warrants, the values of these warrants are likely to fluctuate more than the prices of the underlying securities because of the greater volatility of warrant prices.

h) Futures and Options

The Scheme may use options and futures on securities, indices and interest rates for the purpose of efficient portfolio management.

Transactions in futures and options carry a high degree of risk. A relatively small market movement will have a proportionately larger impact which may work for or against the investor. The placing of certain orders which are intended to limit losses to certain amounts may not be effective because market conditions may make it impossible to execute such orders.

i) Listing

In case the shares of the Scheme are listed, the exchanges on which those shares are listed will have no responsibility for the contents of any prospectus issued by the Scheme or will make no representations as to its accuracy or completeness and expressly disclaim any liability whatsoever for any kind of loss arising from or in reliance upon any part of any such prospectus.

XI. Risk associated with Securities Lending:

It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, rendering the value of collateral inadequate until such time as the diminution in value is replenished by additional security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business set back and become unable to honour its commitments. This, along with a simultaneous fall in the value of collateral would render potential loss to the Scheme. Besides, there will also be temporary illiquidity of the securities that are lent out and the Scheme will not be able to sell such lent out securities until they are returned.

Securities lending may involve the risk of default on the part of the borrower. However, this is unlikely to happen if the stock lending is carried out for stocks which are in dematerialised form and through an authorised stock lending Scheme, subject to appropriate Regulations.

The Investment Manager perceives such situations to be exceptional in nature. Although the Stock Market in India is still developing, considering the good demand for listed / quoted Equity Shares of reputed companies, the Scheme may choose to meet repurchase needs through temporary borrowings, within the permissible limits.

XII. Other Risks:

Zero coupon or Deep Discount Bonds are debt obligations that do not entitle the holder to any periodic payment of interest prior to maturity or a specific date when the securities begin paying current interest and therefore, are generally issued and traded at a discount to their face value. The discount depends on the time remaining until maturity or the date when securities begin paying current interest. It also varies depending on the prevailing interest rates, liquidity of the security and the perceived credit risk of the issuer. The market rates of zero coupon securities are generally more volatile than the market price of securities that pay interest periodically and are likely to respond to changes in interest rates to a greater degree than other coupon bearing securities having similar maturities and creditworthiness.

In the event of substantial investment by the Sponsor/s, or its associates in the Scheme, any redemption by these entities may have an impact on the performance of the Scheme.

Canara Robeco Mutual Fund will not be responsible for any loss of tax benefits in the event of winding up of the Scheme(s) or for any amendments in the tax laws that may affect the tax benefits available under the Scheme. The tax benefits are based on the present laws and rules in force.

Requirement of Minimum Investor in the scheme

The Scheme/Plan shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/Plan. However, if such limit is breached during the NFO of the Scheme, the Fund will endeavor to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme / Plan(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme/Plan shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days notice to redeem his exposure over the 25 % limit. Failure on the part of the said investor to redeem his exposure over the 25 % limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

20. Real Time Gross Settlement (RTGS) & National Electronic Funds Transfer (NEFT)

The AMC provides the facility of 'Real Time Gross Settlement (RTGS)' & 'National Electronic Funds Transfer (NEFT)' offered by Reserve Bank of India(RBI), which aims to provide credit of redemption and dividend payouts (if any) directly into the bank account of the Unit holder maintained with the banks (participating in the RTGS/NEFT System). Unit holders can check the list of banks participating in the RTGS/NEFT System from the RBI website i.e. www.rbi.org.in or contact any of our Investor Service Centres.

However, in the event of the name of Unit holder's bank not appearing in the 'List of Banks participating in RTGS/NEFT' updated on RBI website www.rbi.org.in, from time to time, the instructions of the Unit holder for remittance of redemption/ dividend (if any) proceeds via RTGS/NEFT System will be discontinued by Canara Robeco Mutual Fund / Canara Robeco Asset Management Company Limited without prior notice to the Unit holder and the payouts of redemption / dividend (if any) proceeds shall be effected by sending the Unit holder(s) a cheque / demand draft.

For more details on NEFT or for frequently asked questions (FAQs) on RTGS/NEFT, Unit holders are advised to visit the RBI website www.rbi.org.in

Electronic Clearing Service (ECS)*

Investors who have opted for the ECS facility of RBI for dividend payment will receive a direct credit of the amount due to them in their mandated account whenever the payment is made through ECS. A separate advice regarding credit of amount(s) via ECS will be sent to the unit holder. It should be noted that while the Mutual Fund will make

all efforts, there is no commitment that this facility will be made available to all desirous investors.

Applicants in cities not covered under ECS facility will receive dividend payments , if any by cheques or demand drafts and the same will be mailed to the Unitholders. Please note that the ECS Facility is available only in respect of dividend payments and not in the case of Redemption of Units. Therefore, the Investors will receive their redemption / dividend proceeds (if any) directly into their bank accounts in the following order:

- (i) In case the bank account of an investor is covered under RTGS/ NEFT system offered by the RBI then the payment of redemption / dividend proceeds (if any) shall be effected via RTGS/NEFT mechanism only.
- (ii) The facility for payment of dividend proceeds, if any via ECS* shall be effected only in case the bank account of an investor is not covered under the RTGS/ NEFT system.

* available only in respect of dividend payments.

Each of the above facilities aims to provide direct credit of the redemption proceeds and dividend payouts (if any) into the bank account of the Unit holder and eliminates the time lag between despatch of the cheque, its receipt by the Unit holders and the need to personally bank the instrument and await subsequent credit to the Unit holders account. Further, the potential risk of loss of instruments in transit through courier / post is also eliminated. Each of the said facility as a mode of payment, is faster, safer and reliable. In case the bank account as communicated by the Unit holder is with any of the banks participating in the RTGS/NEFT System offered by RBI, the AMC shall automatically extend this facility to the Unit holders provided unitholders have furnished all requisite information to the AMC to receive such credits.

Canara Robeco Asset Management Company Limited / Canara Robeco Mutual Fund shall not be held liable for any losses / claims, etc. arising on account of processing the credit via RTGS/NEFT/ECS of redemption / dividend proceeds on the basis of Bank Account details as provided by the unit holder in the Application Form.

Canara Robeco Asset Management Company Limited / Canara Robeco Mutual Fund shall not be liable for delayed receipt /non receipt of redemption /dividend amount for reason of incomplete /inaccurate information provided by the unit holders

However, if the Unit holders are not keen on availing of any of the said facilities and prefer receiving cheques / demand drafts, Unit holders may indicate their intention in the Application Form in the space provided specifically. The AMC would then ensure that the payouts are effected by sending the Unit holders a cheque / demand draft. In case of unforeseen circumstances, the AMC reserves the right to issue a cheque / demand draft.

TERMS & CONDITIONS FOR DIVIDEND TRANSFER PLAN

1. Dividend Transfer Plan (DTP) is a facility wherein eligible unit holders under Dividend Option of schemes all existing open & close ended scheme(s) (Source scheme(s)) of Canara Robeco Mutual Fund (CRMF) can opt to automatically invest the dividend (as reduced by the amount of applicable statutory levy) as may be declared by the Source Scheme(s) from time to time into any investment option (other than daily dividend reinvestment option, weekly dividend option) of other eligible schemes* (Target Schemes) of CRMF.

*Under the DTP facility, investors cannot transfer their dividends into close ended schemes, ETFs & ELSS scheme(s) of CRMF.

~ The DTP Facility will be available only to unit holder(s) holding units in non-demat form under Dividend option of the source scheme(s) (other than daily dividend reinvestment option, weekly dividend option).
2. DTP facility is available to unit holder(s) only under the Dividend Plan/Option of the Source Scheme(s). However, the DTP facility will not be available to unit holder(s) under the Daily Dividend Option in the Source Scheme(s). Unit holder(s) enrolment under the DTP facility will automatically override any previous instructions for 'Dividend Payout' or 'Dividend Reinvestment' facility in the Source Scheme.
3. The enrolment for DTP facility should be for all units under the respective Dividend Plan/Option of the Source Scheme. Instructions for part Dividend Transfer and part Dividend Payout/Reinvestment will not be accepted. The dividend amount will be invested in the Target Scheme under the same folio. Accordingly, the unit holder(s) details and mode of holding in the Target Scheme will be same as in the Source Scheme.
4. The enrolment to avail of DTP facility has to be specified for each Scheme/Plan/Option separately and not at the folio level.
5. Under DTP, dividend declared (as reduced by the amount of applicable statutory levy) in the Source scheme (subject to minimum of Rs. 500/-) will be automatically invested into the Target Scheme, as opted by the unit holder, on the immediate next Business Day after the Record Date at the applicable NAV of the Target Scheme, subject to applicable load as specified under point 8 below and accordingly equivalent units will be allotted in the Target Scheme, subject to the terms and conditions of the respective Target Scheme. For example: If the Dividend Record Date of the Source Scheme is June 26 (Friday) and the next Business Day of the Target Scheme (non-Liquid scheme) is June 29 (Monday), the unit holder will be allotted units in the Target Scheme at the closing NAV of June 29 (Monday).
6. The provision for '**Minimum Application Amount**' specified in the respective Target Scheme's Scheme Information Document will not be applicable under DTP. e.g. the minimum application amount for new investors in Canara Robeco Emerging Equity Fund - Growth Plan is Rs.5,000/-. However in case of DTP, a Unit Holder can avail of the facility irrespective of the amount of dividend (subject to a minimum of Rs.500/-).
7. The Minimum amount of dividend eligible for transfer under Dividend Transfer Plan is Rs.500/- (Rupees Five Hundred Only). If the dividend in the Source Scheme is less than Rs.500/- then the dividend will be either paid out or reinvested depending on the dividend option originally selected in the Source Scheme prior to availing the DTP Facility.
8. **Load Structure (Target Scheme):**
Entry Load - Nil

 - Unit holders will have the right to discontinue the DTP facility at any time by sending a written request to the ISC. At the time of discontinuation of DTP facility, the Unit holders should indicate their choice of option i.e. dividend reinvestment or dividend payout. In the event the Unitholder does not indicate his choice of dividend option, the dividend, if any, will be reinvested (compulsory payout if dividend reinvestment option is not available) in the Source Scheme.
